## **PART 7 : STREET LANDSCAPING**

### **7.1 General**

Council will make periodic audits at random intervals to ensure compliance with the specifications.

The Engineer shall carry out checks as required to ensure that:

- Soil preparation is carried out properly
- Tree planting and staking is done at the best time and carried out properly
- Grass areas are well prepared, sown, fertilised and tended during the establishment phase.
- Irrigation system is installed correctly.

The following checklists shall be completed and provided to Council.
